1. The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record fails to teach or fairly suggest a system for transmitting originated information from an originating processor in an electronic mail system to a destination processor in the electronic mail system comprising an RF information transmission network and an interface switch, which connects the electronic mail system to the RF information transmission network, and transmits the originated information received from the electronic mail system to the RF information transmission network, and wherein the originated information is transmitted to the interface switch in response to an address of the interface switch added to the originated information at the originating processor or the electronic mail system and the originated information is transmitted from the interface switch to the RF information transmission network with an address of the destination processor added at the originating processor, or by either the electronic mail system or the interface switch. And further, the electronic mail system transmits other originated information from an originating processor to a destination processor in the electronic mail system through a wireline without transmission using the RF information transmission network.

The applicant has defined a requirement for the electronic mail system in the specification on p. 3, line 29 to p. 4, line 15 as follows.

Electronic mail systems have several common items that must be entered to originate and send an electronic message. These items include **the destination address**, which consists of either the person or company name, abbreviated form of a person's company or name, or a series of digits or alphanumeric characters that must be entered to indicate to the email system the destination address of the recipient processor. Another item is **an identification of the originating processor** which may be an indication of the sender or originator's name, company name, an abbreviated form of the originator's name or company name, or a numeric or alphanumeric entry that comprises the senders name or address. This information is collectively an identification of the originating processor. Another item is **the subject of the message** which is typically a short reference as to the subject matter of the text or message that follows. Finally, **a message or message text must be entered** which is the information inputted by the person or machine which is originating the message at the originating processor.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue
